The Earth God's Band

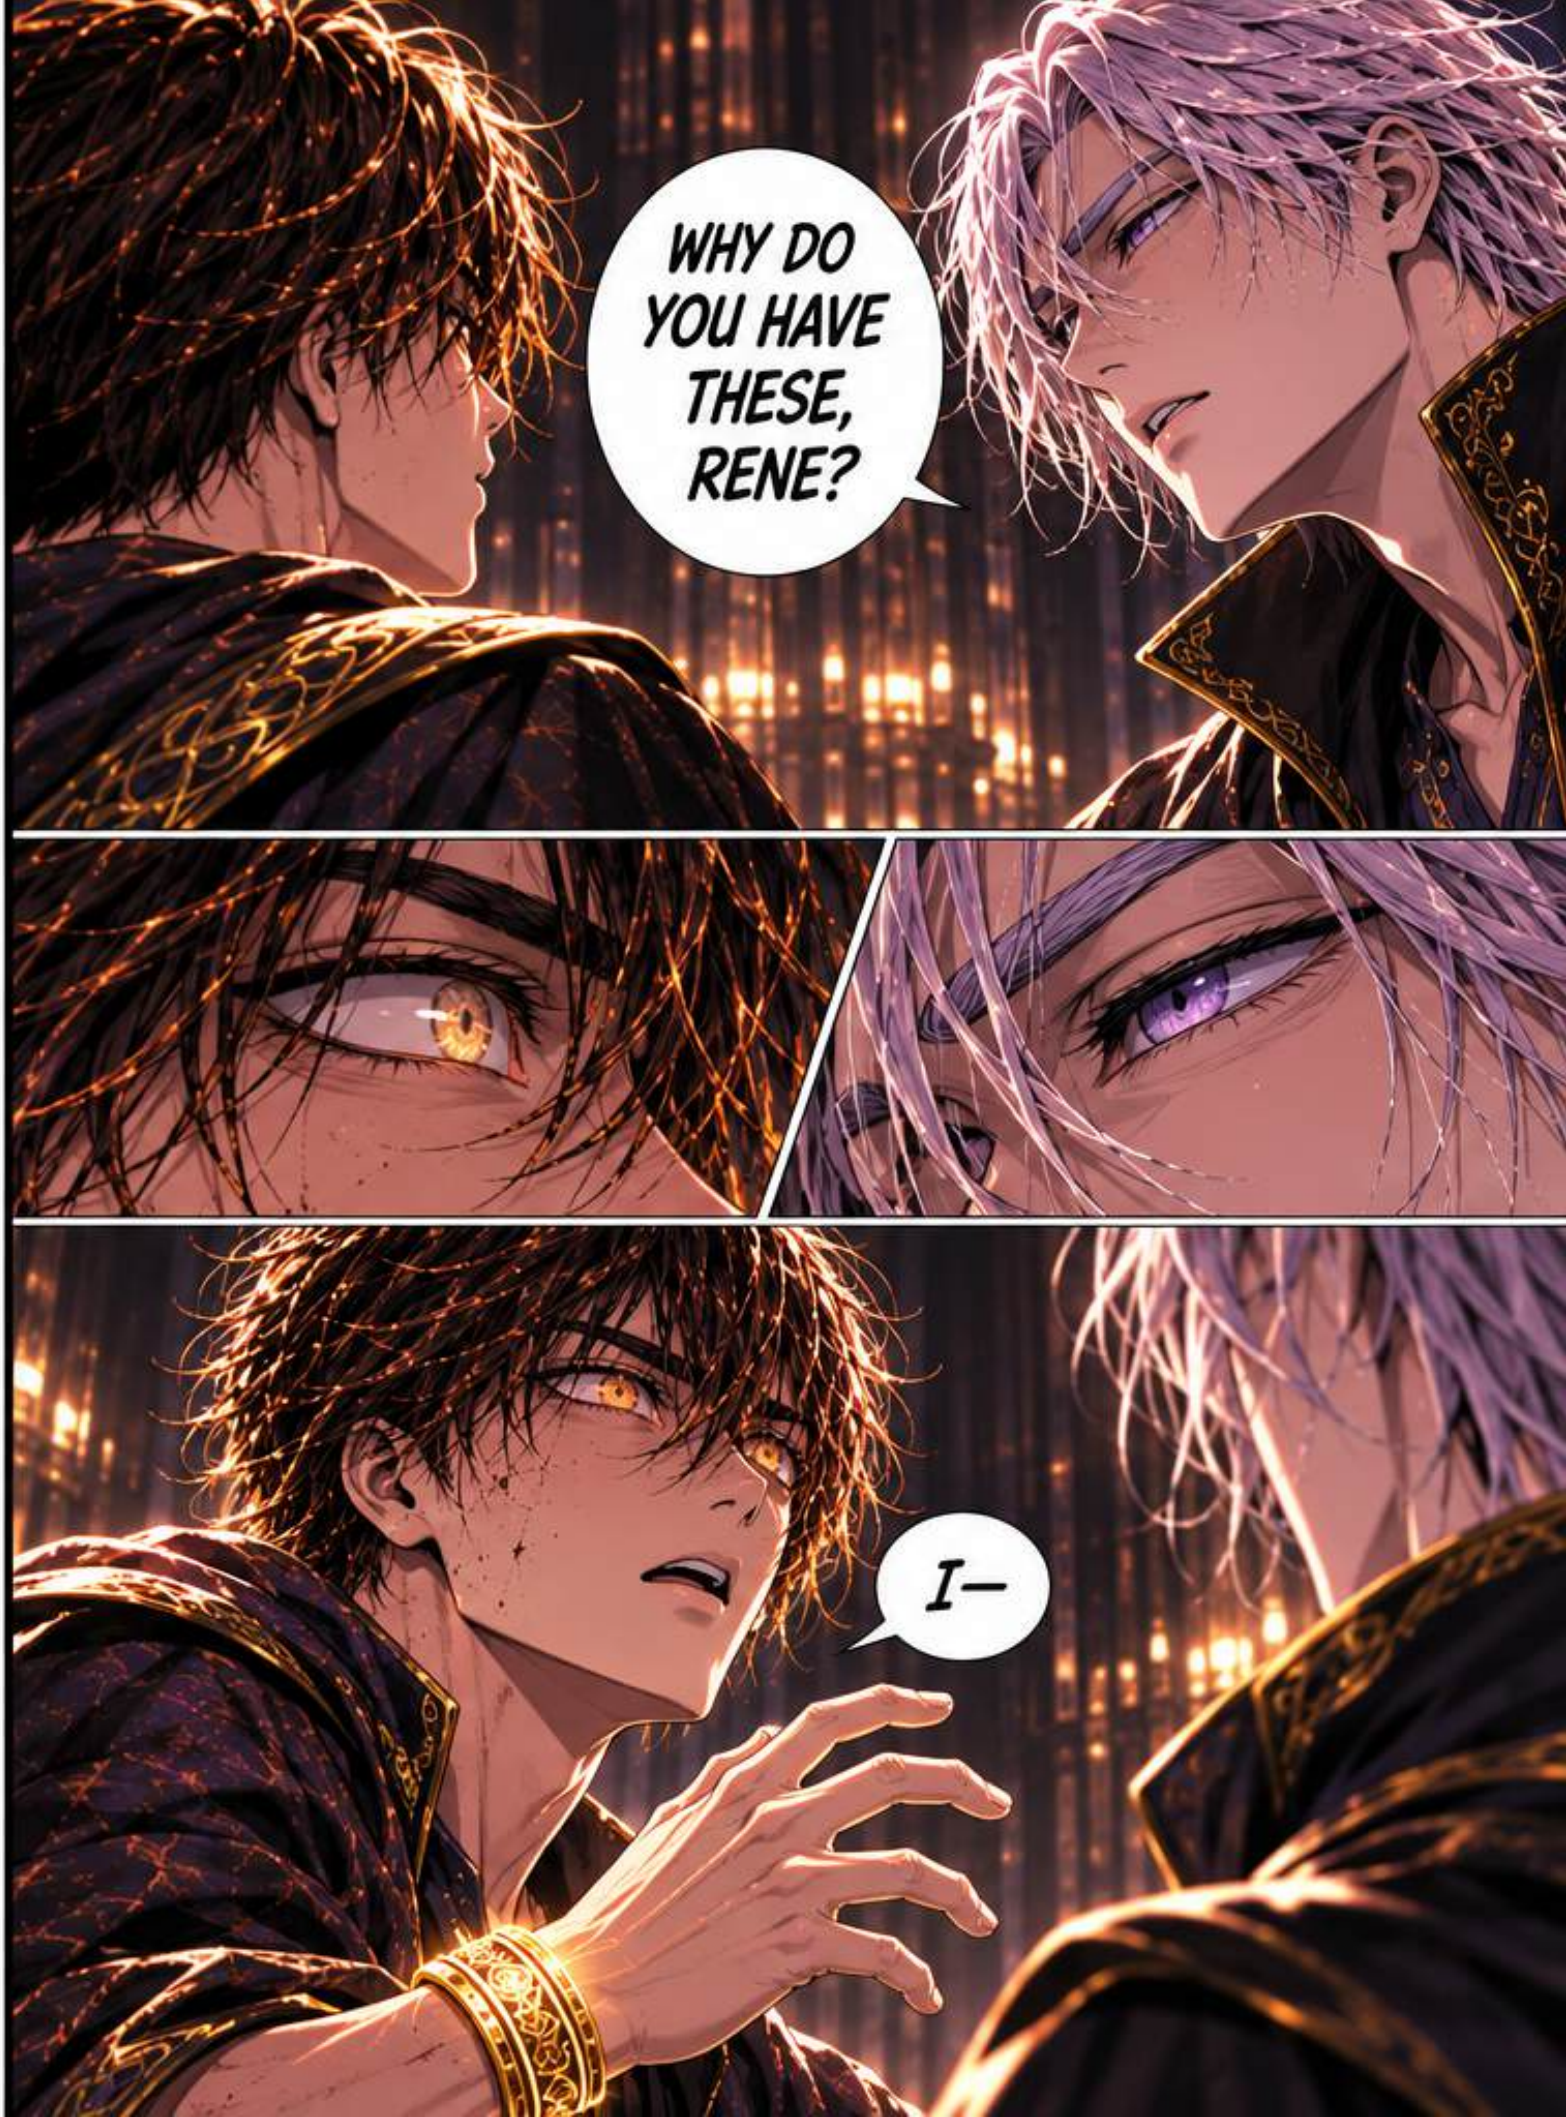

The Earth God's Band holds 0.01% of Kaelrun's power — the essence of the strongest God to ever exist. Even this fraction is enough for its holder to possess power capable of breaking the Earth.

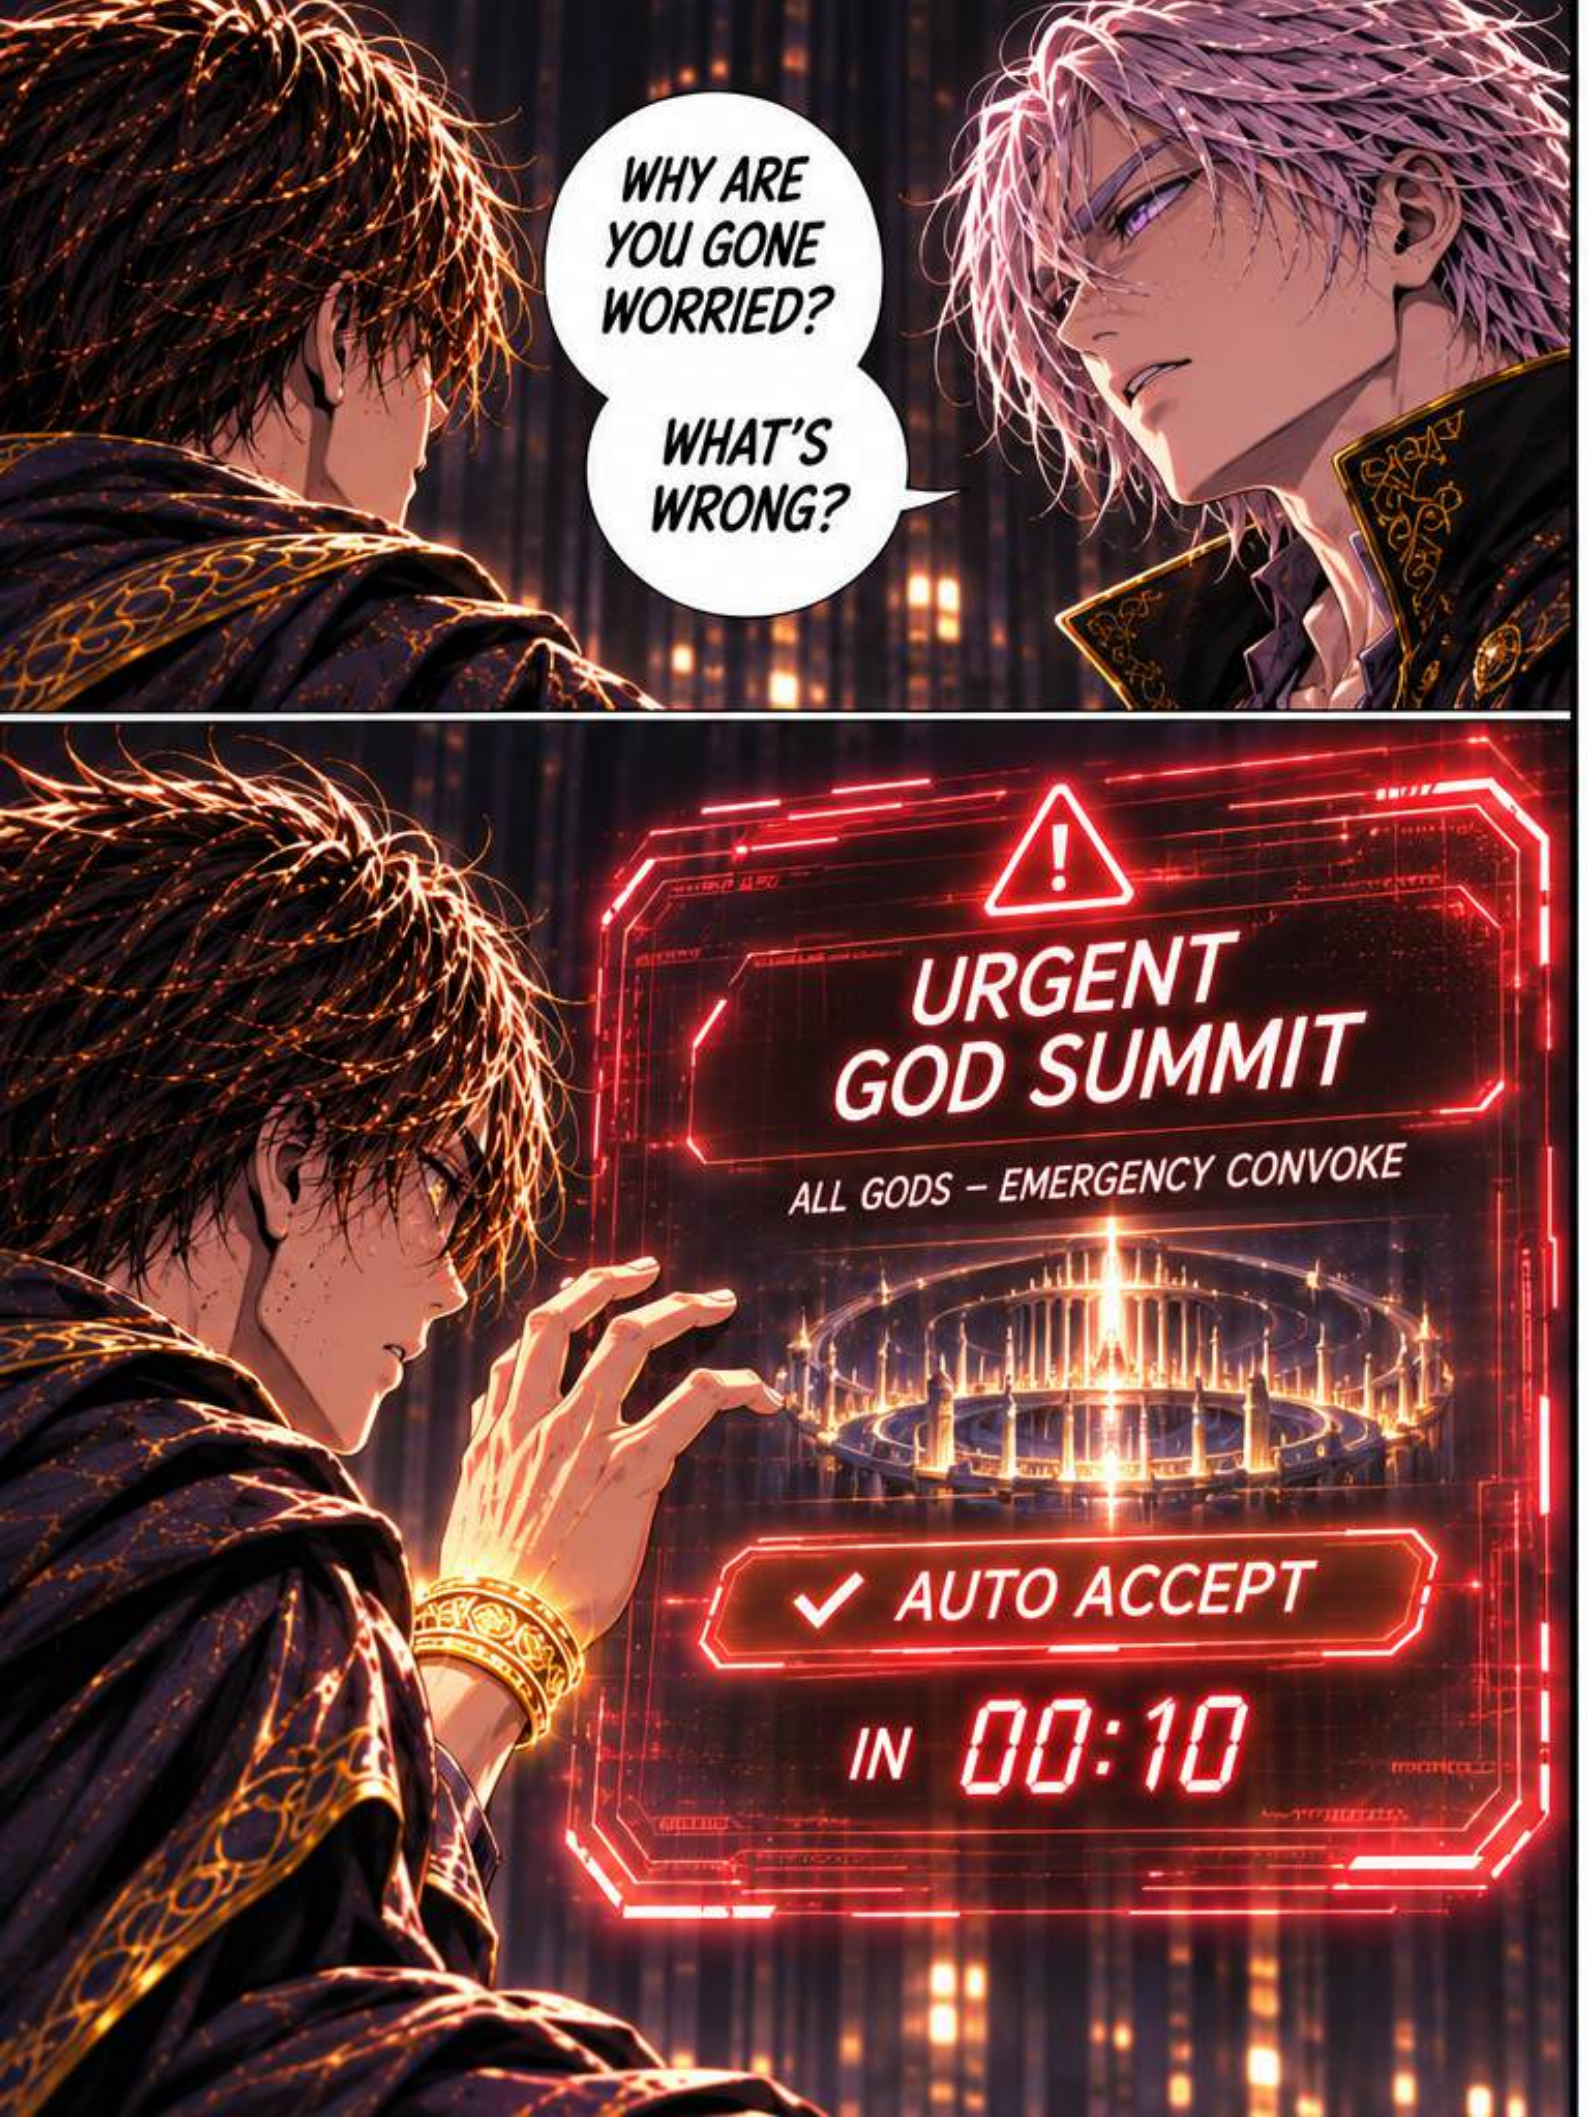

The band does not grant a fixed power. Its true potential awakens through the holder's experience, struggles, and choices. As it is used, the holder's power grows. Its strange golden digital interface reveals a power level and abilities, while much of its system remains sealed.

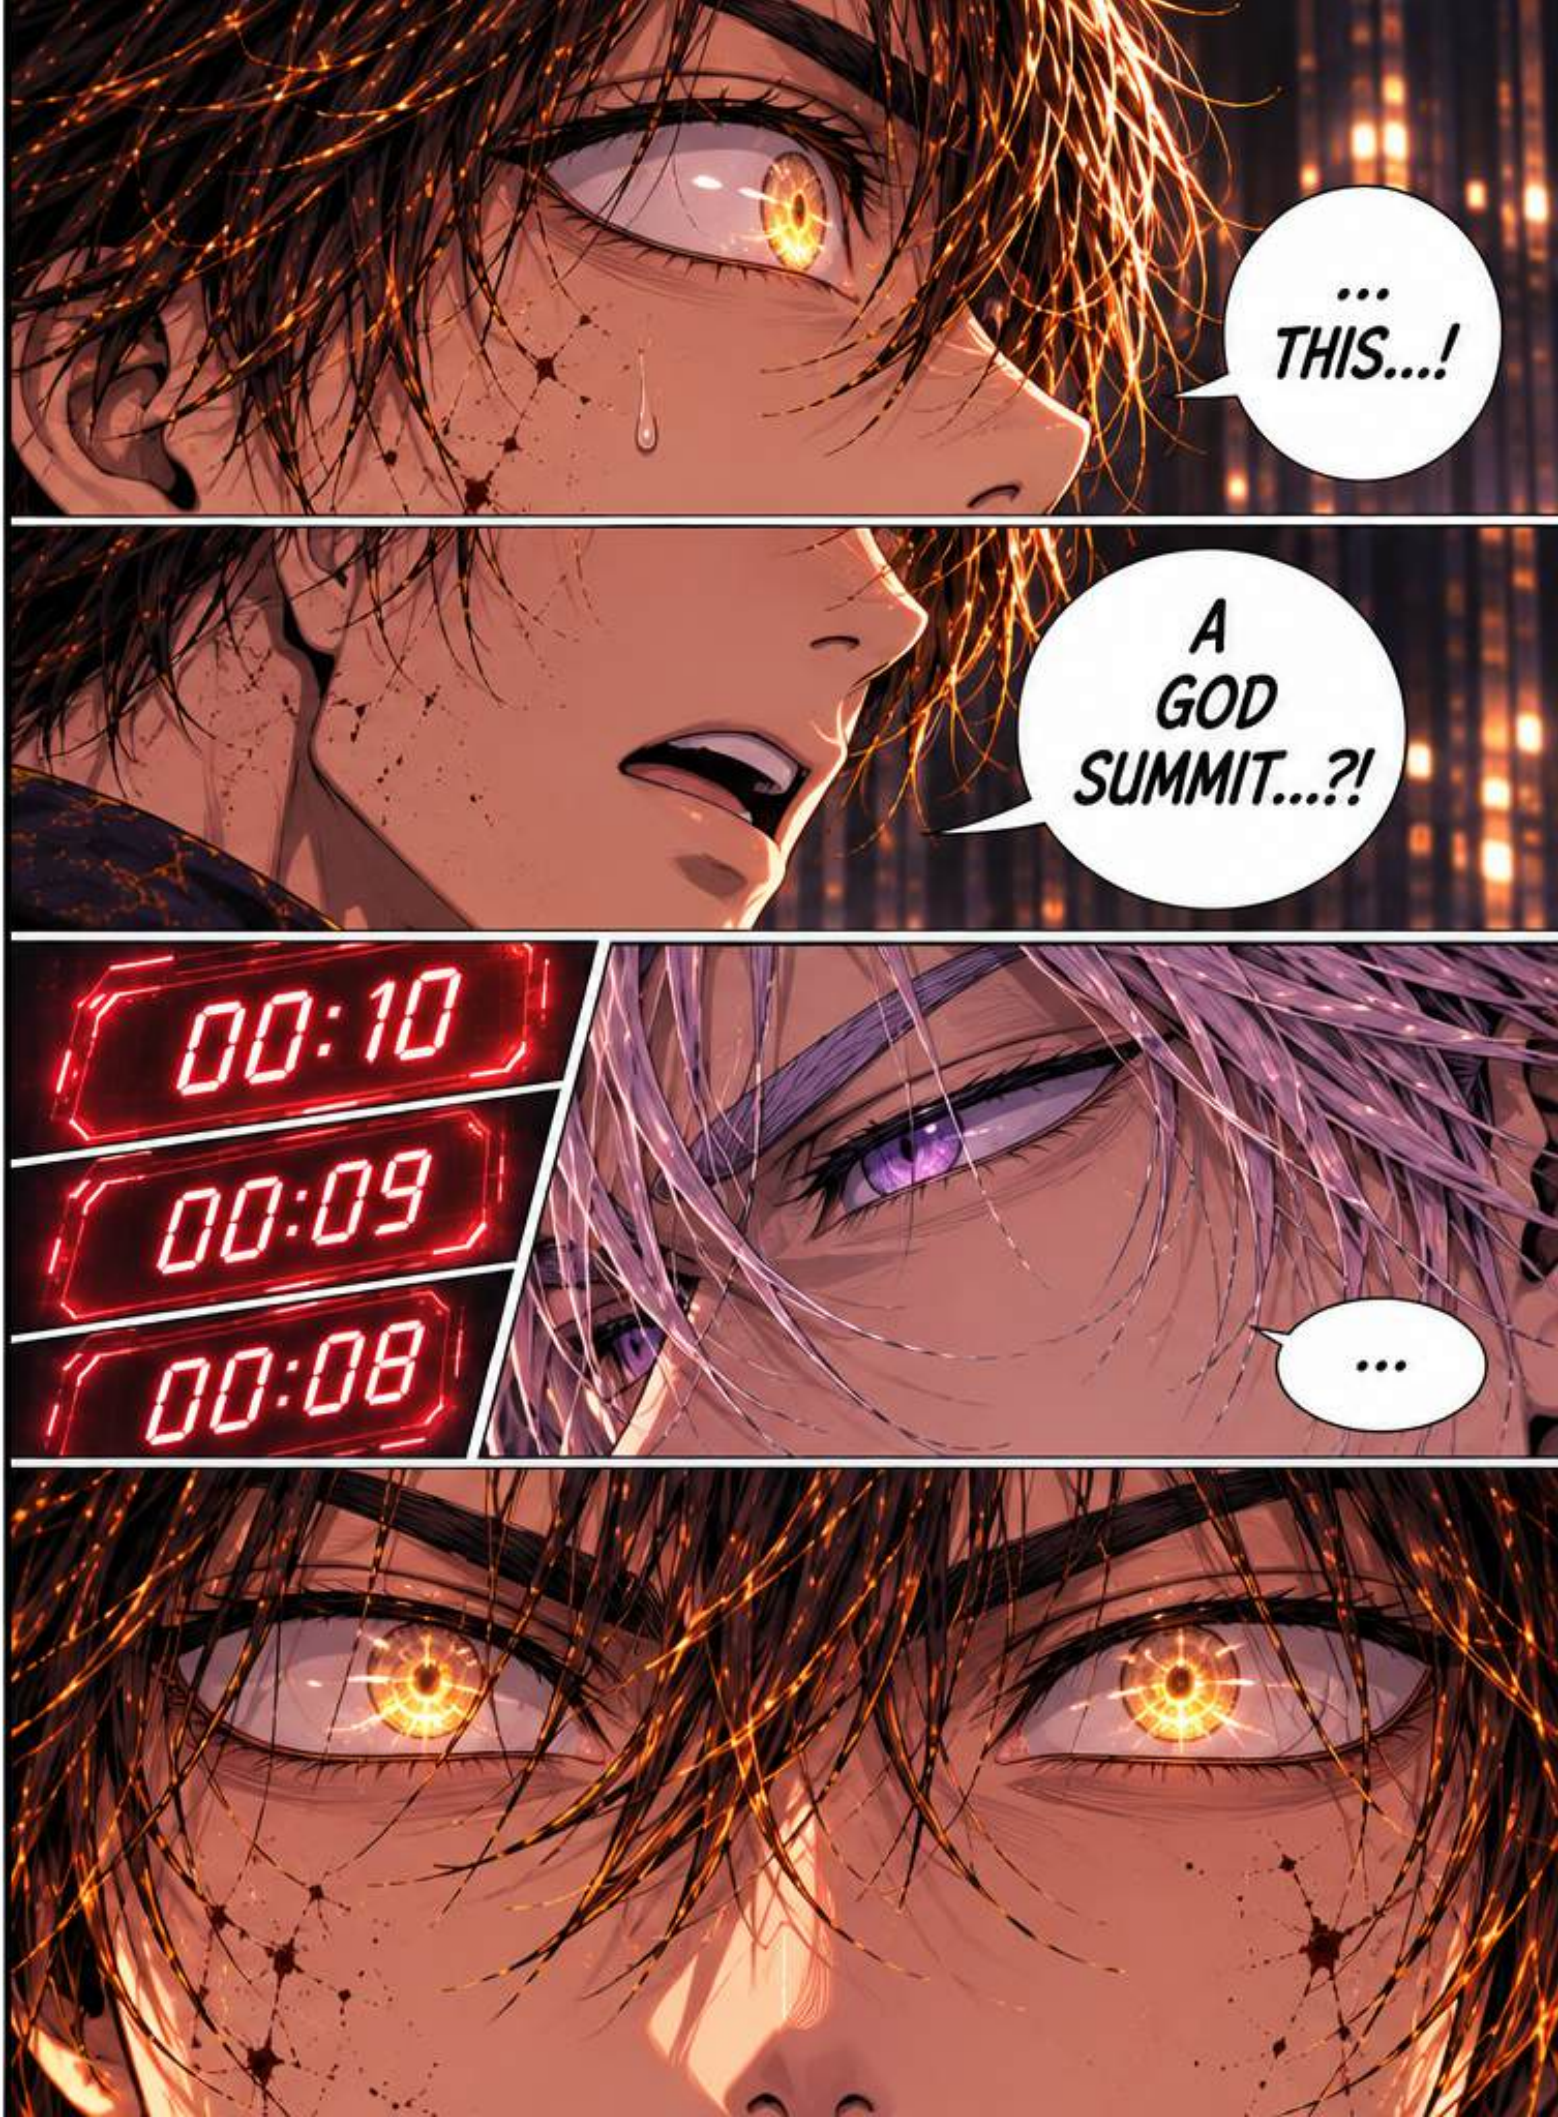

THE POWER WITHIN

A seed of divine power — its growth depends on the one who bears it.
